

SAW Components

SAW Duplexer

WCDMA Band IV (AWS)

| | |
|-----------------------|------------------------|
| Series/type: | B7680 |
| Ordering code: | B39212B7680A710 |
| Date: | June 06, 2008 |
| Version: | 2.0 |

SAW Components

B7680

SAW Duplexer

1732.5 / 2132.5 MHz

Data Sheet

Application

- Low-loss SAW duplexer for mobile telephone WCDMA Band IV (AWS) systems
- Low insertion attenuation
- Low amplitude ripple
- Usable passband 45 MHz
- Single ended to balanced transformation in Antenna - Rx path
- Impedance transformation 50Ω to 100Ω in Antenna - Rx path

Features

- Package size 3.0 x 2.5 x 0.9 mm³
- RoHS compatible
- Approx. weight 0.035 g
- Package for **Surface Mount Technology (SMT)**
- Ni, gold-plated terminals
- Fully matched by integrated matching network
- **Electrostatic Sensitive Device (ESD)**

Pin configuration

- 3 TX Input
- 1, 8 RX Output (balanced)
- 6 Antenna
- 2, 4, 5 To be grounded
- 7, 9 To be grounded

SAW Components

B7680

SAW Duplexer

1732.5 / 2132.5 MHz

Data Sheet

Characteristics

| | |
|--------------------------------------|-------------------------|
| Temperature range for specification: | T = -20 °C to +85 °C |
| Antenna terminating impedance: | Z _{ANT} = 50 Ω |
| RX terminating impedance: | Z _{RX} = 100 Ω |
| TX terminating impedance: | Z _{TX} = 50 Ω |

| Characteristics TX - ANT | min. | typ. @ 25 °C | max. | |
|---|------|-----------------|------|-----|
| Center frequency f _C | | 1732.5 | | MHz |
| Maximum insertion attenuation @ f _{carrier} 1712.4 ... 1752.6 MHz α _{WCDMA} ¹⁾ | | 1.7 | 2.0 | dB |
| Amplitude ripple (p-p) @ f _{carrier} 1712.4 ... 1752.6 MHz Δα _{WCDMA} ¹⁾ | | 0.4 | 1.0 | dB |
| Amplitude ripple (p-p) per 5 MHz-channel 1710.0 ... 1755.0 MHz Δα _{ch} | | 0.2 | 0.5 | dB |
| Error Vector Magnitude @ f _{carrier} 1712.4 ... 1752.6 MHz EVM ²⁾ | | 0.9 | 2.0 | % |
| Input VSWR (TX port) 1710.0 ... 1755.0 MHz | | 1.8 | 2.1 | |
| Output VSWR (ANT port) 1710.0 ... 1755.0 MHz | | 1.6 | 2.0 | |
| Attenuation α | | | | |
| 10.0 ... 1574.0 MHz | 30 | 35 | | dB |
| 1574.0 ... 1577.0 MHz | 40 | 44 | | dB |
| 1805.0 ... 1880.0 MHz | 20 | 43 | | dB |
| 1930.0 ... 1990.0 MHz | 27 | 40 | | dB |
| @ f _{carrier} 2112.4 ... 2152.6 MHz α _{WCDMA} ¹⁾ | 42 | 51 | | dB |
| 2400.0 ... 2500.0 MHz | 29 | 36 | | dB |
| 3420.0 ... 3510.0 MHz | 20 | 29 | | dB |
| 5130.0 ... 5350.0 MHz | 18 | 23 | | dB |
| 5725.0 ... 5850.0 MHz | 15 | 19 | | dB |
| 6840.0 ... 7020.0 MHz | | 10 | | dB |
| 8550.0 ... 8775.0 MHz | | 23 | | dB |
| 10260.0 ... 10530.0 MHz | | 34 | | dB |
| 11970.0 ... 12285.0 MHz | | 31 | | dB |

¹⁾ Attenuation of WCDMA signal ("Powertransferfunction"). Please refer to annotation on page (6).

²⁾ Error Vector Magnitude (EVM) based on definition given in 3GPP TS 25.141.

Maximum ratings

| | | | | |
|---|------------------|------------------|-----|---|
| Temperature range for specification ¹⁾ | T | -20/+85 | | |
| Operable temperature range ²⁾ | T | -30/+85 | °C | |
| Storage temperature range | T _{stg} | -40/+85 | °C | |
| DC voltage | V _{DC} | 5 | V | |
| ESD voltage | V _{ESD} | 50 ³⁾ | V | machine model, 10 pulses |
| Input power at 1710.0 ... 1755.0 MHz | P _{IN} | 29 | dBm | source and load impedance 50 Ω continuous wave T = 50 °C, 5.000 h |
| elsewhere | | 10 | dBm | |

- 1) Defines the temperature range in which the specification values are warranted.
- 2) Defines the temperature range in which the SAW device keeps its typical characteristics, however the specification values are not guaranteed.
- 3) acc. to JESD22-A115A (machine model), 10 negative & 10 positive pulses.

Annotation for characteristics section

Attenuation of WCDMA signal ("Powertransferfunction", α_{WCDMA}) is determined by

$$\int_{-\infty}^{\infty} |S_{\text{ds21}}(f) H_{\text{RRC}}(f - f_{\text{Carrier}})|^2 df$$

f_{Carrier} according to 3GPP TS 25.101 (e.g. for WCDMA Band 5-Passband, f_{Carrier} ranges from 826.4 MHz (lowest Tx channel) to 846.6 MHz (highest Tx channel)). $H_{\text{RRC}}(f)$ is the transfer function of the root-raised cosine transmit pulse shaping filter according to 3GPP TS 25.101 with the following normalization:

$$\int_{-\infty}^{\infty} |H_{\text{RRC}}(f)|^2 df = 1$$

Important notes

The following applies to all products named in this publication:

1. Some parts of this publication contain **statements about the suitability of our products for certain areas of application**. These statements are based on our knowledge of typical requirements that are often placed on our products in the areas of application concerned. We nevertheless expressly point out **that such statements cannot be regarded as binding statements about the suitability of our products for a particular customer application**. As a rule, EPCOS is either unfamiliar with individual customer applications or less familiar with them than the customers themselves. For these reasons, it is always ultimately incumbent on the customer to check and decide whether an EPCOS product with the properties described in the product specification is suitable for use in a particular customer application.
2. We also point out that **in individual cases, a malfunction of electronic components or failure before the end of their usual service life cannot be completely ruled out in the current state of the art, even if they are operated as specified**. In customer applications requiring a very high level of operational safety and especially in customer applications in which the malfunction or failure of an electronic component could endanger human life or health (e.g. in accident prevention or life-saving systems), it must therefore be ensured by means of suitable design of the customer application or other action taken by the customer (e.g. installation of protective circuitry or redundancy) that no injury or damage is sustained by third parties in the event of malfunction or failure of an electronic component.
3. **The warnings, cautions and product-specific notes must be observed.**
4. In order to satisfy certain technical requirements, **some of the products described in this publication may contain substances subject to restrictions in certain jurisdictions (e.g. because they are classed as hazardous)**. Useful information on this will be found in our Material Data Sheets on the Internet (www.epcos.com/material). Should you have any more detailed questions, please contact our sales offices.
5. We constantly strive to improve our products. Consequently, **the products described in this publication may change from time to time**. The same is true of the corresponding product specifications. Please check therefore to what extent product descriptions and specifications contained in this publication are still applicable before or when you place an order. We also **reserve the right to discontinue production and delivery of products**. Consequently, we cannot guarantee that all products named in this publication will always be available. The aforementioned does not apply in the case of individual agreements deviating from the foregoing for customer-specific products.
6. Unless otherwise agreed in individual contracts, **all orders are subject to the current version of the "General Terms of Delivery for Products and Services in the Electrical Industry" published by the German Electrical and Electronics Industry Association (ZVEI)**.
7. The trade names EPCOS, BAOKE, Alu-X, CeraDiode, CSSP, CTVS, DSSP, MiniBlue, MKK, MLSC, MotorCap, PCC, PhaseCap, PhaseMod, SIFERRIT, SIFI, SIKOREL, SilverCap, SIM-DAD, SIMID, SineFormer, SIOV, SIP5D, SIP5K, ThermoFuse, WindCap are **trademarks registered or pending** in Europe and in other countries. Further information will be found on the Internet at www.epcos.com/trademarks.
