1. Introduction

The Verdin DSI to HDMI Adapter is an add-on board for Toradex's carrier boards which uses a MIPI-DSI interface to provide an HDMI output.

The Verdin DSI to HDMI Adapter uses a Lontium Semiconductor LT8912B MIPI® DSI to HDMI bridge. It features a single-channel MIPI® D-PHY receiver front-end configuration with 4 data lanes operating at a maximum of 1.5Gbps per data lane and a maximum input bandwidth of 6Gbps.

The bridge provides an HDMI 1.4 standard data output with a resolution up to 60Hz 1080p 8-bit.

The Verdin DSI to HDMI Adapter can be connected to the MIPI® DSI connector of compatible Verdin carrier boards.
