General Description

The Alpha 3A adhesive antenna is based on an efficiently tuned PCB that is matched with a wide variety of RF & M2M applications, operating on quad band 2G, 3G, 4G, 5G, LoRa, ISM and 2.4 GHz applications like Wi-Fi, Bluetooth, etc. It is designed as a ready to go antenna which fits most telemetry products.

Already proven in many applications where space is at a premium, this product is ideal as it is ground plane independent and compact, making it a popular choice where the user does not want to draw attention to having telemetry equipment on board.

Alternative cable lengths or connector types can be specified for volume orders.

NOTE: For each frequency band, Siretta provides a traffic light indication to show the suitability of the antenna for use at that frequency band. Determination of exactly what makes an antenna good or bad at any frequency is subjective.

The view presented is that of Siretta's engineering team having taken into account the efficiency and VSWR measurements. The end user is advised to use their own criteria and/or testing to confirm suitability.
