① Molded case circuit breakers having a rated ampacity of 125 amperes or less are to be connected with 60 or 75°C wire. Circuit breakers having a rated ampacity greater than 125 amperes shall only be cabled with 75°C cable unless otherwise indicated on the circuit breaker label. Exceptions to this rule are outlined in article 110-14 C(1)(2) of the 2005 National Electrical Code.

② For CED types and all 110–125 ampere ED frames.

③ Molded case switches up to R frame contain a self protecting instantaneous element, which may open circuit above their override set point.

① When applied on DC Circuits — Trip levels will increase approximately +15 to 20%.

② Tolerance -20%/+30% for lowest setting. All other settings are -20%/+20%

③ Connectors included when ordering by circuit breaker catalog number for HEM, ED and CED6 ETIs. Order ETI circuit breaker and lugs (2 per pole) separately for the FXD6, CFD6, MXD6, CMD6, JXD6, CJD6, LXD6 and CLD6 ETI's.
