

## MIRO TEMP. CONVERTER PT100 - 2/3-LEAD METHOD

IN: 0°C..+100°C - OUT:0..10 V / (0)4..20 mA

Art.No.: 6644332 Weight: 0.05 Country of origin: CZ

Model designation: MTW- 0-100C MIRO 2/3 LEITER

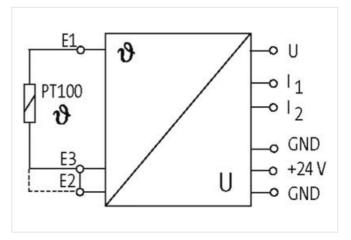

INPUT: 0...100 °C Spring clamp terminals

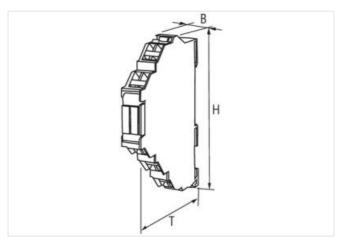

Murrelektronik's temperature converters convert a temperature into the usual signal variables (0...10 V, 4...20 mA, 0...20 mA) in conjunction with a PT100 temperature sensor (IEC 751/EN 60751). For this purpose, the MTW modules supply a constant current which causes a voltage drop at the PT100 resistor. This is linearized and converted into the corresponding output signals at the OUT terminals. All 3 signals can be used simultaneously. The 2-wire technique can be used for short distances between PT100 sensor and MTW module (<5 m). The 3-wire measuring method must be used for longer distances to compensate the measuring line resistance. For this purpose, a 3rd line (same length and design as the two measuring lines) is required. In this case, the factory-equipped bridge connecting E2 and E3 must be removed.
