SERIES: CFM-120V | DESCRIPTION: DC AXIAL FAN

FEATURES

• omniCOOL™ bearing system

same sky

- 120 x 120 mm frame
- multiple speed options for different cooling needs
- tachometer signal and rotation detect options available
- auto restart protection standard on all models

Notes:

1. At rated voltage, 25°C, 0 inch H₂O static pressure, after 10 minutes 2. As per AMCA 210 or DIN 24163, at rated voltage, stabilized RPM, 0 inch H₂O static pressure 3. As per AMCA 210 or DIN 24163, at rated voltage, stabilized RPM, 0 CFM airflow.

Measured in a semi-anechoic chamber with background noise < 15 dBA at 1 m from the fan intake.
 All specifications are measured at 25°C, 65% relative humidity unless otherwise specified.
 Discontinued models.

APPLICATION NOTES

Auto Restart Protection

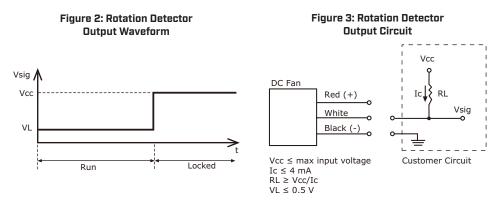

When the fan motor is locked by an external force, the device will temporarily turn off electrical power to the motor and restart automatically when the locked rotor condition is released.

Figure 1: Auto Start Protection

Rotation Detector Signal (White Wire)

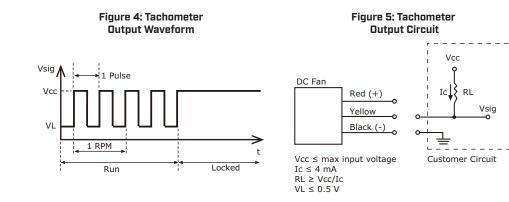

The rotation detector signal is used to detect if the fan motor is operating or stopped. The output will be logical low (VL) when fan is operating and be logical high (Vcc) when fan motor is locked. (See Figures 2~3 below).

Tachometer Signal (Yellow Wire)

The tachometer signal is for detecting the rotational speed of the fan motor. The output will be a square wave when fan is operating and logical high (Vcc) when fan motor is locked (See Figures 4~5 below). The relationship between RPM & output pulses from the signal wire is as follows.

SAFETY CONSIDERATIONS

- 1. Do not use or operate this fan in excess of the limitations set forth in this specification. Same Sky is not responsible for the nonperformance of this fan and/or any damages resulting from its use, if it is not used or operated in accordance with the specifications.
- Same Sky recommends adding a protection circuit to the product or application in which this fan is installed, such as a thermo-fuse, or current fuse or thermo-protector. The failure to use such a device may result in smoke, fire, electric shock by insulation degradation in cases of motor lead short circuit, overload, or over voltage, and/or other failure.
- 3. Same Sky recommends installing a protection device to the product or application in which this fan is installed if there is a possibility of reverse connection between Vdc (+) and GND (-). The failue to install such a device may result in smoke, fire, and/or destruction, although these conditions may not manifest immediately.
- 4. This fan mush be installed and used in compliance with all applicable safety standards and regulations.
- 5. Use proper care when handling and/or installing this fan. Improper handling of installation of this fan may cause damage that could result in unsafe conditions.
- 6. Use proper care during installation and/or wiring. Failure to use proper care may cause damage to certain components of the fan including, but not limited to, the coil and lead wires, which could result in smoke and/or fire.
- 7. Do not use power or ground PWM to control the fan speed. If the fan speed needs to be adjusted, please contact Same Sky to customize the product design for your application.
- 8. For critical or extreme environments, including non-stop operation, please contact Same Sky and we will gladly provide assistance with your product selection to ensure an appropriate cooling product for your application.
- 9. When building your device, please examine thouroughly any variation of EMC, temperature rise, life data, quality, etc. of this product by shock/drop/vibration testing, etc. If there are any problems or accidents in connection with this product, it should be mutually discussed and examined.
- 10. Use proper care when handling these fans. Components such as fan holders or bearings may be damaged, if touched with fingers or other objects. Additionally, static electricity (ESD) may damage internal circuits of the fan.
- 11. Do not operate these fans in proximity to hazardous materials such as organic silicon, cyanogens, formalin, phenol, or corrosive gas environments including, but not limited to, H₂S, SO₂, NO₂, or Cl₂.
- 12. Same Sky recommends that you protect these fans from exposure to outside elements such as dust, condensation, humidity, or insects. Exposure of this fan to such elements may affect its performance and my cause safety hazards. Same Sky does not warrant against damage to the product caused by outside elements.
- 13. The fans must be installed properly and securely. Improper mounting may cause harsh resonance, vibration, and noise.
- 14. Do not store these fans in an environment with high humidity. These fans must be stored in accordance with the specified storage temperature.
- 15. Same Sky reserves the right to use components from multiple sources at its discretion. The use of components from other sources will not affect the specifications as described herein.
- 16. The life expectancy of these fans has not been evaluated for use in combination with any end application. Therefore, the life expectancy that relate to these fans are only for reference.

REVISION HISTORY

rev.	description	date
1.0	initial release	07/26/2017
1.01	discontinued CFM-A225V-322-340, CFM-A225V-327-405, CFM-A225V-331-445, CFM-A238V-321-370, CFM-A238V-326-440, CFM- A238V-331-480 models	09/12/2018
1.02	brand update	02/07/2020

The revision history provided is for informational purposes only and is believed to be accurate.

Same Sky offers a one (1) year limited warranty. Complete warranty information is listed on our website.

same sky

Same Sky reserves the right to make changes to the product at any time without notice. Information provided by Same Sky is believed to be accurate and reliable. However, no responsibility is assumed by Same Sky for its use, nor for any infringements of patents or other rights of third parties which may result from its use.

.....

Same Sky products are not authorized or warranted for use as critical components in equipment that requires an extremely high level of reliability. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
