## Guide to products

The following are typical products of the HRM series. Various products other than those listed here are also available. Please inquire about them.

## Connectors for semi-rigid cables HRM-100~199

Connectors for semi-rigid cables match two types of cables: .141-inch and .085-inch semi-rigid cables. Use the .141-inch cables in order to obtain the V.S.W.R. listed on P.90. The .085-inch cables, which have good flexibility, are suitable when high-density wiring is to be used inside the set. In this case, the V.S.W.R. value will be higher than with the .141-inch cables.
