

ArbStudio Arbitrary Waveform Generators

Key Features

- Outstanding performance with 16-bit, 1 GS/s sample rate and 2 Mpts/Ch
- 2 and 4 channel models
- Digital pattern generator
- PWM mode
- Sweep and burst modes
- Modulation AM, FM, PM, **ASK, SK, PSK**
- Synchronize multiple devices Unmatched Performance for up to 32 channels
- Easy access to basic function generator mode

ArbStudio waveform generators meet the needs of today's engineers and technicians with uncompromised performance, a wide variety of signal types, modulation schemes and generation modes all controlled through an intuitive, easy to use software interface.

ArbStudio combines 125 MHz bandwidth with long 2 Mpts/Ch memory, fast 1 GS/s sample rate and high 16-bit resolution to provide performance unmatched by other generators. Other instruments make trade-offs between these specifications, only ArbStudio provides leading specification in every category. Along with this unmatched performance is the variety of models providing both 2 and 4 channel configurations as well as a digital pattern generator of up to 36 channels.

Flexibility

With both Arbitrary and Direct Digital Synthesis (DDS) ArbStudio offers extremely flexible generation capabilities. Math and noise functions are built-in and can be combined with waveforms. Up to 8 total 4 channel models can be synchronized with the AS-SYNC cable.

Pulse-Width Modulation

Creating PWM signals has never been easier thanks to a dedicated control panel designed just for PWM waveforms. Easily set modulation shape, duty cycle and all other aspects of the PWM plus configure different settings for each channel.

UNMATCHED WAVEFORM GENERATION

Intuitive User Interface

The ArbStudio software provides an intuitive interface for creating, editing and sequencing waveforms. All channels, settings and controls can be accessed from the main screen and waveforms can be previewed in the graph display.

Function Generator

All basic Sine, Square and Triangle waveforms can be created from a simple screen with controls that replicate a traditional bench top generator.

Modulation

Built-in modulation capabilities include AM, PM, FM, ASK, PSK and FSK. The modulation editor provides easy-to-use tools to configure the modulation scheme for any application.

Digital Pattern Generator

Many systems have a variety of analog and digital signals yet most waveform generators provide only analog outputs. The ArbStudio 1102D and 1104D models provide analog and digital pattern generation with 18 or 36 channels respectively.

EASY ACCESS TO ALL WAVEFORM CREATION TOOLS

ArbStudio has an intuitive software interface that brings all the important controls to the main screen providing easy access to all channels, output controls, trigger controls and waveform creation screens.

1. Channel Controls

Access to all controls, waveforms and modulation capabilities of all channels.

2. Channel Status

Set or update the status and configuration of each channel or digital pod.

3. Output Controls

Enable the waveform output and control ArbStudio triggering.

4. Waveform List

Displays all waveforms that have been created during the current session or any waveform saved in the library.

5. Waveform Display

See the waveforms as they are created or view the waveforms loaded in the sequencer.

6. Waveform Sequencer

Configure the waveform sequence with only a few mouse clicks and view the output below.

7. BNC Outputs

ArbStudio is available in 2 and 4 channel configurations with a maximum output of 12 V_{p-p.}

8. Clock and Trigger Input/Output

Trigger in and trigger out connections for working with other equipment are provided as well as an external clock input.

Customer Service

Teledyne LeCroy oscilloscopes and probes are designed, built, and tested to ensure high reliability. In the unlikely event you experience difficulties, our digital oscilloscopes are fully warranted for three years and our probes are warranted for one year.

This warranty includes:

- No charge for return shipping
- Long-term 7-year support
- Upgrade to latest software at no charge

Mouser Electronics
