

*SST12LP15B is a versatile power amplifier based on the highly-reliable InGaP/GaAs HBT technology. Easily configured for high-linear operation meeting the EVM requirements for 256 QAM applications, and for high-efficiency applications with excellent power-added efficiency while operating over the 2.4- 2.5 GHz frequency band. Configured for high efficiency, SST12LP15B will typically meet the 802.11g spectrum mask at 23 dBm with 270 mA. Configured for high linearity, SST12LP15B will provide less than 2.5% EVM, up to 20 dBm, with MCS7-HT40 modulation, and less than 1.75% EVM, up to 18 dBm, with MCS9-VHT40 modulation. This power amplifier also features easy board-level usage along with high-speed power-up/down control through the reference voltage pins. The SST12LP15B is offered in both a 3mm x 3mm, 16-contact VQFN package and a 2mm x 2mm, 12-contact XQFN package.*

## Features

- **High Gain:**
  - More than 32 dB gain across 2.4–2.5 GHz over temperature -40°C to +85°C
- **Configured for High Linearity**
  - 20 dBm at 2.5% DEVM, MCS7-HT40, 200mA
  - 18 dBm at 1.8% DEVM, MCS9-VHT40, 180 mA
  - 23 dBm typical spectrum mask compliance, MCS0-20
- **Configured for High Efficiency**
  - 23 dBm at 3% DEVM, 802.11g OFDM 54 Mbps, 310mA
  - 25.5 dBm typical spectrum mask compliance, 802.11b, 1Mbps
  - >29 dBm P1dB
  - Meets 802.11g OFDM ACPR requirement up to 26 dBm
- **High power-added efficiency/Low operating current**
- **Low I<sub>REF</sub> current for power-up/down control**
  - I<sub>REF</sub> <2 mA
- **High-speed power-up/down**
  - Turn on/off time (10%- 90%) <100 ns
  - Typical power-up/down delay with driver delay included <200 ns
- **Low Shut-down Current:2μA**
- **High temperature stability**
  - Typically 1 dB gain/power variation between 0°C to +85°C
- **Excellent On-chip power detection**
  - 20 dB linear dynamic range
  - Temperature- and VSWR-insensitive
- **Simple input/output matching**
- **Packages available**
  - 16-contact VQFN – 3mm x 3mm
  - 12-contact XQFN – 2mm x 2mm
- **All non-Pb (lead-free) devices are RoHS compliant**

## Applications

- **WLAN (IEEE 802.11b/g/n/256 QAM)**
- **Cordless phones**
- **2.4 GHz ISM wireless equipment**

## Product Description

SST12LP15B is a versatile power amplifier based on the highly-reliable InGaP/GaAs HBT technology.

This power amplifier can be easily configured for both high-efficiency with low EVM for high data rate applications and for high power-added efficiency (PAE) while operating over the 2.4- 2.5 GHz frequency band. There are two application circuits provided to show this versatility.

Configured for high power-added efficiency, SST12LP15B provides more than 32 dB gain and typically meets 3% EVM up to 23 dBm output power for 54 Mbps 802.11g operation. This power amplifier also meets spectral mask compliance output power up to 25 dBm for 802.11g and up to 25.5 dBm for 802.11b operation. At 4.5V operation, the SST12LP15B-VQFN provides up to 24 dBm at 3% EVM.

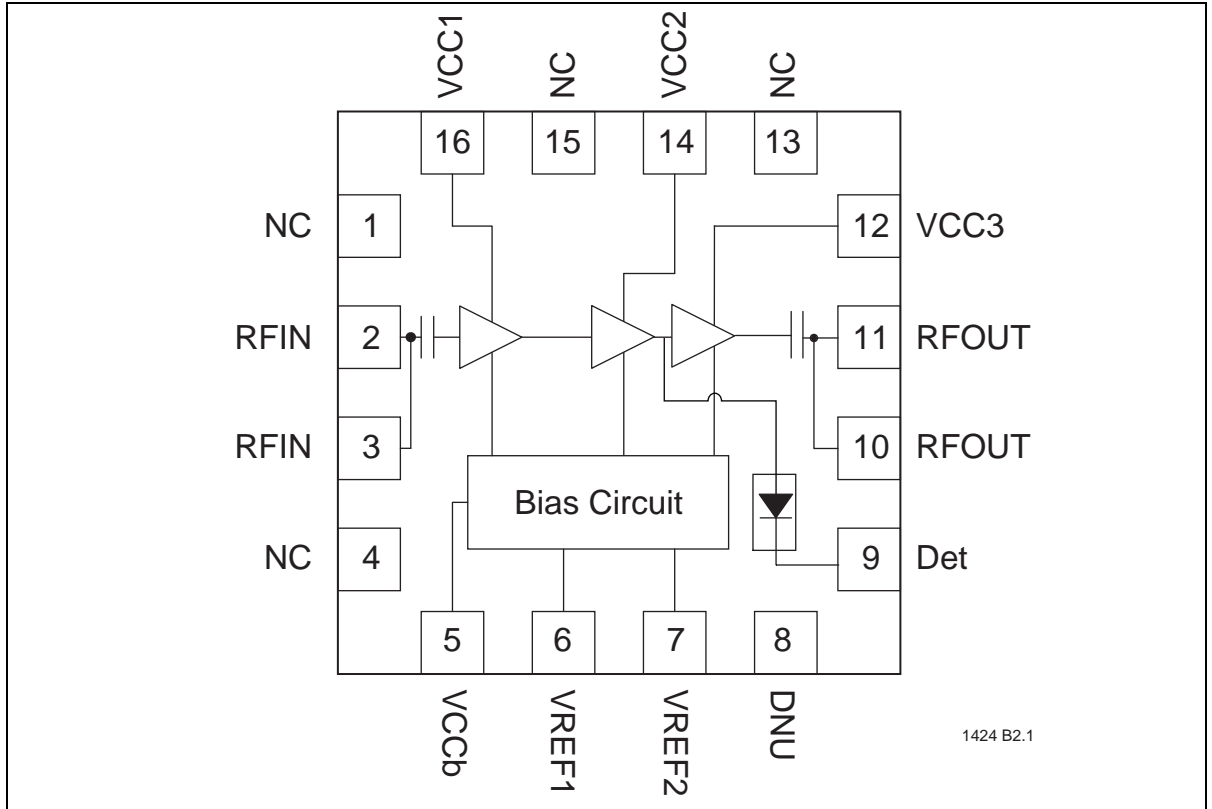

Configured for high linearity, SST12LP15B provides more than 34 dB gain. It typically meets 2.5% EVM up to 20 dBm using MCS7-HT40 modulation and meets 1.8% EVM up to 18 dBm using MCS9-VHT40 modulation.

This device also features easy board-level usage along with high-speed power-up/down control through the reference voltage pins. Ultra-low reference current (total  $I_{REF} \sim 2$  mA) makes the SST12LP15B controllable by an on/off switching signal directly from the baseband chip. These features coupled with low operating current make SST12LP15B ideal for the final stage power amplification in battery-powered 802.11b/g/n/256 QAM WLAN transmitter applications.

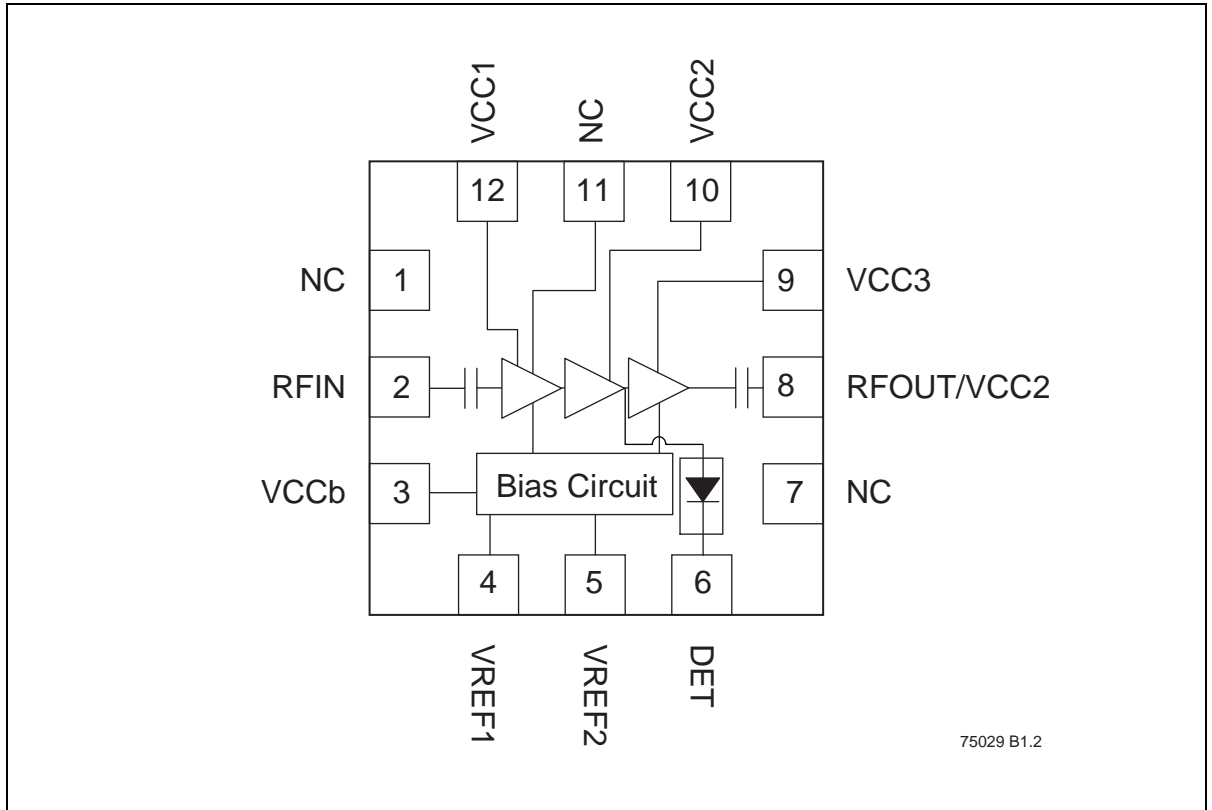

The power amplifier has an excellent, wide dynamic range (>20 dB), dB-wise linear on-chip power detector. The excellent on-chip power detector provides a reliable solution to board-level power control.

The SST12LP15B is offered in both 16-contact VQFN (3mm x 3mm) and 12-contact XQFN (2mm x 2mm) packages. See Figures 3 and 4 for pin assignments and Tables 1 and 2 for pin descriptions.

**Functional Blocks**

### Electrical Specifications

The DC and RF specifications for the power amplifier are specified below.

**Absolute Maximum Stress Ratings** (Applied conditions greater than those listed under “Absolute Maximum Stress Ratings” may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these conditions or conditions greater than those defined in the operational sections of this data sheet is not implied. Exposure to absolute maximum stress rating conditions may affect device reliability.)

Average Input power ( $P_{IN}$ ) <sup>1</sup> . . . . .	+5 dBm
Average output power ( $P_{OUT}$ ) <sup>1</sup> . . . . .	+28 dBm
Supply Voltage ( $V_{CCb}$ , $V_{CC1}$ , $V_{CC2}$ , $V_{CC3}$ ) . . . . .	-0.3V to +5.0V <sup>2</sup>
Reference voltage ( $V_{REF1}$ , $V_{REF2}$ ) . . . . .	-0.3V to +3.3V
DC supply current ( $I_{CC}$ ) <sup>3</sup> . . . . .	500 mA
Operating Temperature ( $T_A$ ) . . . . .	-40°C to +85°C
Storage Temperature ( $T_{STG}$ ) . . . . .	-40°C to +120°C
Maximum Junction Temperature ( $T_J$ ) . . . . .	+150°C
Surface Mount Solder Reflow Temperature . . . . .	260°C for 10 seconds

1. Never measure with CW source. Pulsed single-tone source with <50% duty cycle is recommended. Exceeding the maximum rating of average output power could cause permanent damage to the device.
2. Output power must be limited to 20 dBm at 5V  $V_{CC}$  and limited to 26 dBm at 4.5V  $V_{CC}$
3. Measured with 100% duty cycle 54 Mbps 802.11g OFDM Signal

**Table 3: Operating Range**

Range	Ambient Temp	$V_{CC}$
Industrial	-40°C to +85°C	3.0V to 4.5V

T3.1 75029

Table 4 shows the DC and RF characteristics for the configuration that achieves high linearity for 802.11n and 256 QAM applications. The associated schematic is shown in Figure 25 for the 16-contact VQFN package. The RF performance is shown in figures 20 through 24.

Table 5 shows the DC and RF characteristics for the configuration that achieves high power-added efficiency (PAE). The associated schematic is shown in Figure 18 for the 16-contact VQFN package. The RF performance is shown in figures 13 through 17.

**Packaging Diagrams**

**16-Lead Very Thin Quad Flatpack No-Leads (QVCE/F) - 3x3 mm Body [VQFN]**

**Note:** For the most current package drawings, please see the Microchip Packaging Specification located at <http://www.microchip.com/packaging>

- Note:**
1. Complies with JEDEC JEP95 MO-220J, variant VEED-4 except external paddle nominal dimensions.
  2. From the bottom view, the pin #1 indicator may be either a 45-degree chamfer or a half-circle notch.
  3. The external paddle is electrically connected to the die back-side and possibly to certain VSS leads. This paddle can be soldered to the PC board; it is suggested to connect this paddle to the VSS of the unit. Connection of this paddle to any other voltage potential can result in shorts and/or electrical malfunction of the device.
  4. Untoleranced dimensions are nominal target dimensions.
  5. All linear dimensions are in millimeters (max/min).

**Figure 26:** 16-contact Very-thin Quad Flat No-lead (VQFN)  
 Package Code: QVC

## 12-Lead Extremely Thin Quad Flatpack No-Leads (QXBE/F) - 2x2 mm Body [XQFN]

**Note:** For the most current package drawings, please see the Microchip Packaging Specification located at <http://www.microchip.com/packaging>

**Note:**

1. Complies with JEDEC JEP95 MO-220J, variant VEED-4 except external paddle nominal dimensions and pull-back of terminals from body edge.
2. The topside pin #1 indicator is laser engraved; its approximate shape and location is as shown.
3. From the bottom view, the pin #1 indicator may be either a curved indent or a 45-degree chamfer.
4. The external paddle is electrically connected to the die back-side and possibly to certain VSS leads. This paddle must be soldered to the PC board; it is required to connect this paddle to the VSS of the unit. Connection of this paddle to any other voltage potential will result in shorts and electrical malfunction of the device.
5. Untoleranced dimensions are nominal target dimensions.
6. All linear dimensions are in millimeters (max/min).
