

MOSFET - N-Channel, SUPERFET®

600 V, 20 A, 190 m Ω

FCA20N60

Description

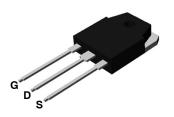

SUPERFET MOSFET is **onsemi**'s first generation of high voltage super-junction (SJ) MOSFET family that is utilizing charge balance technology for outstanding low on- resistance and lower gate charge performance. This technology is tailored to minimize conduction loss, provide superior switch- ing performance, dv/dt rate and higher avalanche energy. Con- sequently, SuperFET MOSFET is very suitable for the switching power applications such as PFC, server/telecom power, FPD TV power, ATX power and industrial power applications.
