SmartKeeper USB Type C Blockout Device

specifications

Panduit SmartKeeper USB Type C Blockout Device shall be compatible with USB-C ports. The device shall lock in place by sliding in the port and pushing the locking mechanism, blocking the port to prevent access to sensitive data and to reduce the potential spread of malware through USB enabled devices. The device shall be utilized in host or peripheral devices with USB Type C connections. The USB Type C Blockout Device shall only unlock with the use of the SmartKeeper Master Key.

technical information

RoHS compliant:	Yes
Temperature range:	-4°F (-20°C) to + 140°F (+60°C)
Material:	Polycarbonate and Brass Steel/Nickel Plated
Packaging:	One unit per package

key features and benefits

|	
Tamper Resistant	Device will protect connections from unauthorized access, protecting sensitive data and reducing the risk of spreading malware
Ease of use	Installs with a single push
Compatibility	Compliant with USB Type C ports
Master Key	Unique locking mechanism can only be accessed with a special master key

applications

USB Type C port or USB-C is expected to eventually replace the larger USB Type A ports and other connections such as DisplayPort or 3.5mm audio jack. It will become the convenient way to charge and operate multiple devices. It will also become an easy way to spread malware, to gain access or steal sensitive data.

Panduit SmartKeeper USB Type C Blockout Device will lock and block USB-C ports and can only be removed with Panduit's SmartKeeper Master Key. This tamper resistant device provides an economical way to add a physical layer to USB-C ports found in a variety of equipment or devices, saving time and money associated with data security breaches, network downtime, infrastructure repair and hardware replacement.
