PCB terminal block, nominal current: 32 A, rated voltage (III/2): 630 V, nominal cross section: 4 mm<sup>2</sup>, pitch: 7.62 mm, number of positions: 2, connection method: Screw connection with tension sleeve, mounting: Wave soldering, conductor/PCB connection direction: 0 °, color: green, Pin layout: Linear pinning, Solder pin [P]: 5.1 mm

The figure shows a 2-pos. version of the product

#### Your advantages

- ☑ Well-known connection principle allows worldwide use
- ☑ Low temperature rise, thanks to maximum contact force
- Mallows connection of two conductors
- The latching on the side enables various numbers of positions to be combined

| Insulating material group                                    | 1            |
| CTI according to IEC 60112                                   | 600          |
| Flammability rating according to UL 94                       | V0           |
| Glow wire flammability index GWFI according to EN 60695-2-12 | 850          |

### Technical data

### Material data - housing

| Glow wire ignition temperature GWIT according to EN 60695-2-13    | 775    |
|-------------------------------------------------------------------|--------|
| Temperature for the ball pressure test according to EN 60695-10-2 | 125 °C |

### Dimensions for the product

| Length [1]                  | 12.5 mm      |
|-----------------------------|--------------|
| Width [ w ]                 | 15.24 mm     |
| Height [ h ]                | 26.6 mm      |
| Pitch                       | 7.62 mm      |
| Height (without solder pin) | 21.5 mm      |
| Solder pin [P]              | 5.1 mm       |
| Pin dimensions              | 0.9 x 0.9 mm |

### Dimensions for PCB design

|  | Hole diameter | 1.3 mm |
|--|---------------|--------|
|--|---------------|--------|

### Packaging information

| Type of packaging          | packed in cardboard |
|----------------------------|---------------------|
| Pieces per package         | 50                  |
| Denomination packing units | Pcs.                |

### General product information

| Type of note | Note on application                                                                                                                                                                                                                                                                                                                                                               |
|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Note         | For safe conductor connection, always adhere to a defined tightening<br>torque. Particularly in the case of PCB terminal blocks with two or<br>three positions, the individual solder pin for each contact point cannot<br>compensate for this. That is why the terminal blocks must be supported<br>during conductor connection (held with one hand, support on the<br>housing). |

### Ambient conditions

| Ambient temperature (storage/transport) | -40 °C 70 °C                                                                                          |
|-----------------------------------------|-------------------------------------------------------------------------------------------------------|
| Ambient temperature (assembly)          | -5 °C 100 °C                                                                                          |
| Ambient temperature (operation)         | -40 $^\circ\text{C}$ 100 $^\circ\text{C}$ (Depending on the current carrying capacity/derating curve) |

### Termination and connection method

| Test for conductor damage and slackening | IEC 60998-2-1:1990-04 |
|------------------------------------------|-----------------------|
|                                          | Test passed           |

### Pull-out test

| Pull-out test                                            | IEC 60998-2-1:1990-04       |
|----------------------------------------------------------|-----------------------------|
|                                                          | Test passed                 |
| Conductor cross section / conductor type / tensile force | 0.2 mm² / solid / > 10 N    |
|                                                          | 0.2 mm² / flexible / > 10 N |
|                                                          | 6 mm² / solid / > 80 N      |
|                                                          | 4 mm² / flexible / > 60 N   |

### Technical data

### Mechanical tests according to standard

| Test specification                    | IEC 60998-2-1 (in parts) |
