

TRANSFORMER SELECTION GUIDE FOR SIEMENS TELECOM ICs

- ⊕ Transformers, hybrids and common mode chokes specifically matched to Siemens transceiver ICs
- ⊕ Applications include ISDN-BRI S and U interfaces, ISDN-PRI/T1/E1 and ISDN U_{P0}
- ⊕ Safety agency approvals for most models
- ⊕ Surface mount and through hole models

TYPICAL T1/CEPT APPLICATION

COMMON MODE CHOKES

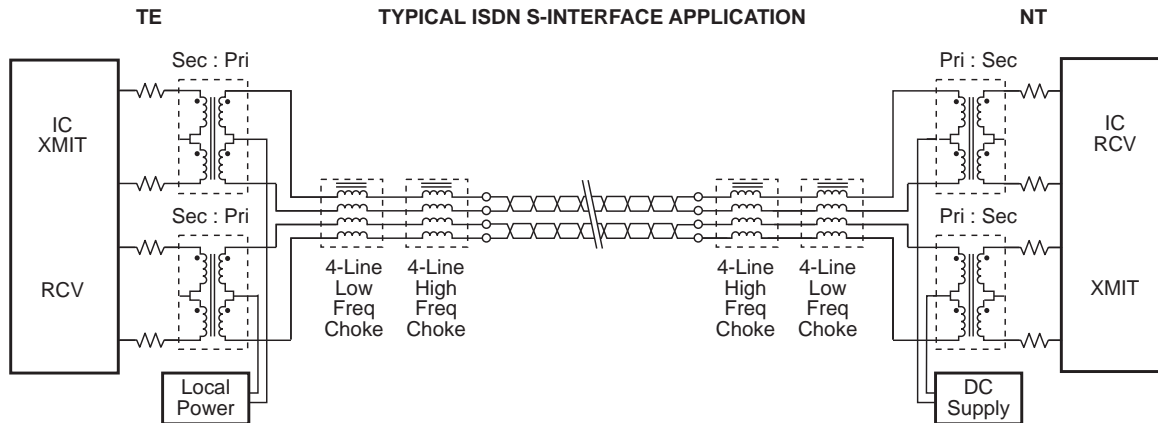

- ⊕ Designed for 2-wire and 4-wire digital links
- ⊕ Models for EMI reduction and improving balance in ISDN S applications
- ⊕ Low frequency models effective from 100 KHz to 50 MHz
- ⊕ High frequency models effective from 1 MHz to 300 MHz

ISDN S-INTERFACE TRANSFORMERS

-  Characteristics matched to Siemens transceiver chips
-  Designed to meet layer 1 requirements of ITU I.430
-  Safety agency approvals per EN 41003/ EN 60950 and UL 1459
-  Excellent longitudinal balance

ISDN U-INTERFACE TRANSFORMERS

IU-3

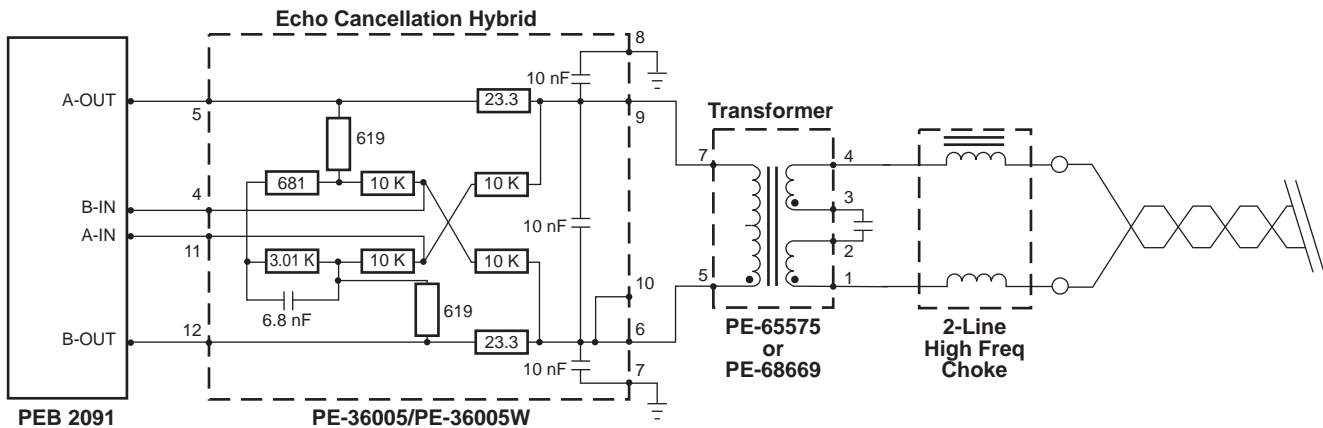

-  For ISDN U-Interface 2B1Q Applications
-  Characteristics matched to Siemens transceiver chips
-  Meets key parameters of ANSI T1-601-1992
-  Space savings Echo Cancellation Hybrid available

Notes

- The purpose of the T609 data sheet is to serve as a selection guide for Pulse products matched to Siemens telecom transceiver chips. For complete electrical, mechanical and safety information, request the data sheet listed next to the part number. The data sheets can be requested through any Pulse location worldwide, authorized distributors, the WEB site or through the "Quick-Facts" system. Please see the back page for more information.
- In this catalog, turns ratio is expressed as "primary:secondary". The term "CT" designates a center tapped winding. The term "CS" designates a split center tap winding. A center tapped winding can be created by connecting two ends of a split center winding together on the printed circuit board. In ISDN S applications, the primary winding is the line side transformer winding.
- Standard packaging for the chokes and transformers listed in this catalog is anti-static tubes. Optional anti-static tray packaging can be ordered for the surface mount SC and LA packages by adding an "R" suffix to the part number, (ie: PE-65795R). Optional tape and reel packaging can be ordered for surface mount packages by adding a "T" suffix to the part number, (ie: PE-65795T). See Table A for more information.

ISDN U_{P0} AND ISDN U_{pn} TRANSFORMERS

- Characteristics matched to Siemens transceiver chips
- Available in surface mount and through hole packages
- PE-68975 is electrically equivalent to PE-64995
