Datasheet

FXUB62.07.0150C

Patent Pending

Description:

LTE Wide Band Flex Antenna
698MHz -3000 MHz

Features:

- Patent Pending
- Ground Plane Independent
- Operates at 4G Bands from 698-3000MHz
- >45% Efficiency on All covered bands
- 5dBi Peak Gain
- I-PEX MHF® I (U.FL comp)
- 150mm Ø1.37 coaxial cable
- Dimensions: 96*21*0.2 mm
- RoHS & Reach Compliant

1. Introduction

The patent pending FXUB62 flexible wideband antenna has been designed to cover all working frequencies in the 698-3000MHz spectrum, covering all Cellular, 2.4GHz Wi-Fi, ISM and AGPS. The antenna is delivered with a flexible body with excellent efficiencies on all bands, ground independent, with cable and connector for easy installation.

The FXUB62 flexible polymer antenna, at 96*21*0.2mm, is ultra thin and wideband with high efficiencies across the bands. It is assembled by a simple “peel and stick” process, attaching securely to non-metal surfaces via 3M adhesive. It enables designers to use only one antenna that covers all common LTE frequencies.

Typical Applications Include:

- Wearable Healthcare Devices
- Point of Sale Terminals
- Handheld Devices

The FXUB62 antenna is a durable flexible polymer antenna that has a peak gain of 5dBi, an efficiency of more than 45% across the bands and is designed to be mounted directly onto a plastic or glass cover. It is an ideal choice for any device maker that needs to keep manufacturing costs down over the lifetime of a product. It is ground plane independent and delivered with a cable and connector for easy connecting to the wireless module or customer PCB.

Cables and Connectors are fully customizable. Like all such antennas, care should be taken to mount the antenna at least 10mm from metal components or surfaces, and ideally 20mm for best radiation efficiency. For further information, please contact your regional Taoglas customer support team.

2. Specifications

| 5G/4G Bands | | | |
|-------------|--|----------------------|---------|

5. Mechanical Drawing (Units: mm)

ISO NO.: EDW-22-8-0138

STATE: Release

- NOTES:
1. No dregs or insufficient soldering. Solder thickness 0.3~1.7mm.
 2. The solder must be smooth and full to the edges of the pad. The solder must not extend outside of the pad area.
 3. The connector position has special orientation to the PCB as per drawing.
 4. All material must be RoHS compliant.
 5. Open/short QC, VSWR required.
 6. Soldered area:
 7. ** Critical Dimensions.
