GPS/GLONASS/Galileo SMD Patch Antenna

Part No:
SGGP.18.4.A.08

Description

18*18*4mm GPS/GLONASS/Galileo SMD Patch Antenna

Features:

SMD Direct Mount Ceramic Patch Antenna

GPS/Galileo/GLONASS Antenna

GPS L1/Galileo E1 (1575.42 MHz) – 50% Efficiency

GLONASS L1 (1602 MHz) – 73% Efficiency

Dimensions: 18*18*4mm

RoHS & Reach Compliant

1. Introduction

The Taoglas SGGP.18 is a ceramic GPS/GLONASS/Galileo passive patch antenna designed for optimal performance on GPS L1/Galileo E1 band (1575.42 MHz) and GLONASS L1 band (1602 MHz). With a low-profile thickness of just 4mm and convenient mounting via standard SMD process, it is ideal for high-volume assembly applications. SGGP.18 is designed for applications such as navigation devices, vehicle tracking/fleet management systems, and telematics devices. It is an excellent choice for applications in transportation, defense, marine, agriculture, and navigation industries.

This antenna has been tuned for use on a 50mm*50mm ground plane to achieve 3.02 dBi gain at 1575.42MHz and 2.62 dBi gain at 1602MHz. In addition to excellent efficiency, it also offers a broadly hemispherical radiation pattern with stable gain across elevations.

SGGP.18 is manufactured and tested in an IATF16949 first tier automotive approved facility. For further optimization to customer-specific device environments, custom tuned patch antennas can be supplied, subject to NRE and MOQ.

For further information or support with integrating this antenna into your device, please contact your regional Taoglas customer support team.

2. Specification

GNSS Frequency Bands

4. Antenna Integration Guide

The following is an example on how to integrate the SGGP.18.4.A.08 into a design. This antenna has nine pins, one pin is used for the RF Feed. Taoglas recommends using a minimum of 50x50mm ground plane (PCB) to ensure optimal performance.

Top view of PCB.

Please find the integration files, 2D and the 3D models for the SGGP.18.4.A.08 here:

<https://www.taoglas.com/product/sggp-18-4-a-08-gps-glonass-galileo-smd-18184mm-mount-patch/>

4.1 Schematic and Symbol Definition

Above is the 3D model of the SGGP.18.4.A.08 on the PCB.

The circuit symbol for the SGGP.18.4.A.08 is shown below. The antenna has 9 pins as indicated below.

Pin	Description
1	RF Feed
2, 3, 4, 5, 6, 7, 8, 9	Ground

Above is a schematic symbol of SGGP.18.4.A.08 and a table of the pin definitions.

4.2 Antenna Footprint

PCB FOOTPRINT

Pin	Description
1	RF Feed
2, 3, 4, 5, 6, 7, 8, 9	Ground

4.3 Top Solder Paste

4.4 Copper Clearance for SGGP.18.4.A.08

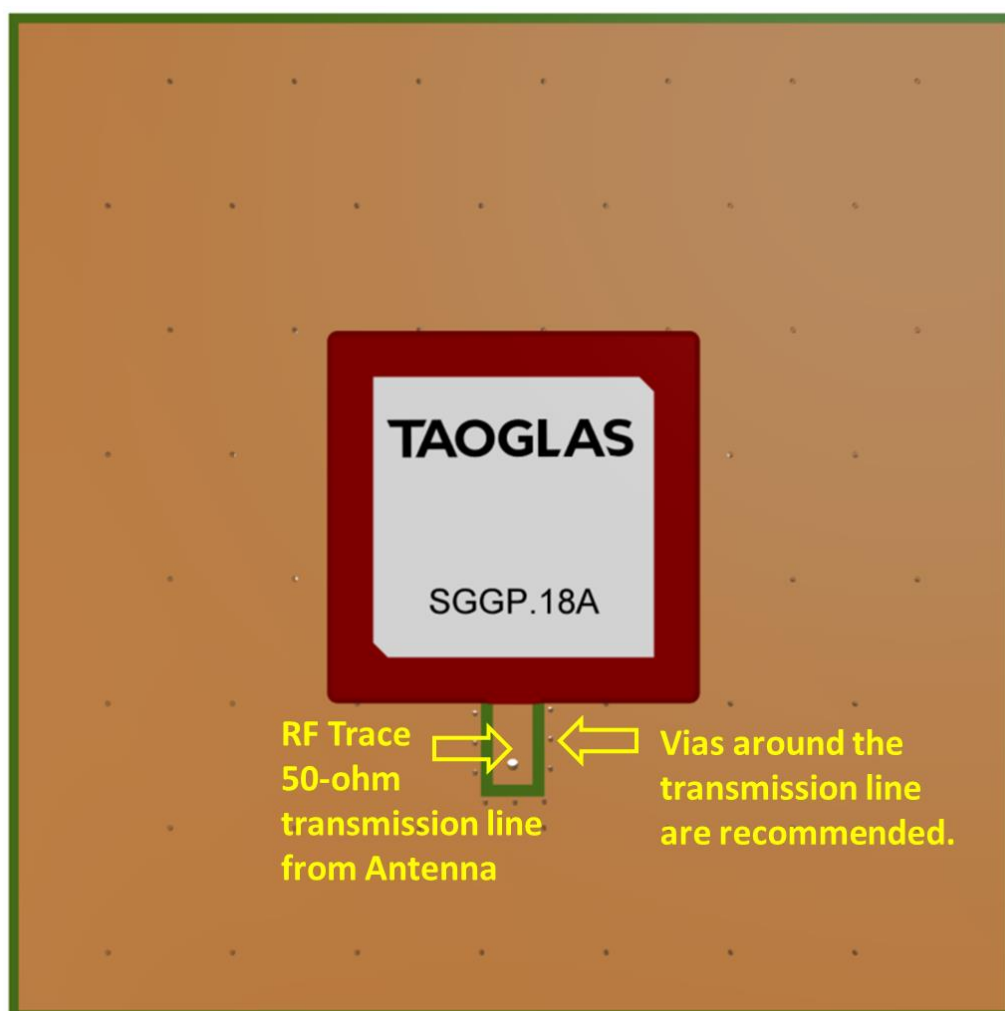

The footprint and clearance on the PCB must comply with the antenna's specifications. The PCB layout shown in the diagrams below demonstrates the SGGP.18.4.A.08 clearance area for Pin 1 (RF Feed Pad). The copper keep-out area applies to all layers beneath the antenna. There should be a 3x4mm copper clearance area around the antenna feed pad on the top side of the PCB.

Copper Clearance for Pin 1 (RF Feed Pad) of the SGGP.18.4.A.08.

4.5 Antenna Integration

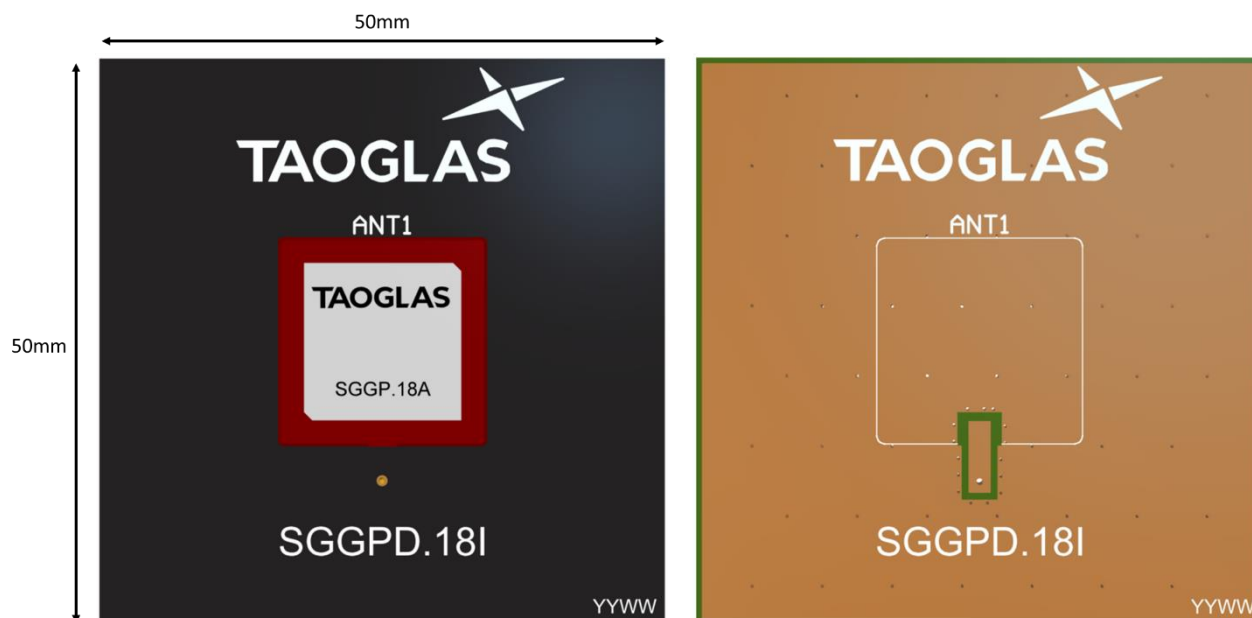

The SGGP.18.4.A.08 should be placed in the centre of the PCB to take advantage of the ground plane. The RF trace must maintain a 50Ω transmission line. Ground vias should be placed around the transmission line and copper clearance area.

Top view of the PCB, showing transmission line and integration notes.

4.6 Evaluation Board Ground Plane Length

The image shown below highlights the transmission line of the antenna. Taoglas recommends using a minimum of 50x50mm ground plane (PCB) to ensure optimal performance.

5. Solder Reflow Profile

The SGGP.18.4.A.08 can be assembled by following the recommended soldering temperatures are as follows:

*Temperatures listed within a tolerance of $\pm 10^{\circ}\text{C}$

Smaller components are typically mounted on the first pass, however, we do advise mounting the SGGP.18.4.A.08 when placing larger components on the board during subsequent reflows.

Note: Soldering flux classified ROL0 under IPC J-STD-004 is recommended.

6. Packaging

200 pc SGGP.18.4.A.08 per reel
 Dimensions - Ø330*33mm
 Weight - 2.125Kg

200 pc SGGP.18.4.A.08 per small box
 Dimensions - 350*340*67mm
 Weight - 2.125Kg

800 pcs SGGP.18.4.A.08 per carton
 Dimensions - 370*360*305mm
 Weight - 8.5Kg
