

Type CRGH Series

Thick Film Resistors with high power to size ratio, ideally suited to industrial and general purpose use

Value range from 1Ω to $10M\Omega$

Seven package sizes

Terminal finish matte Sn over Ni

The resistive element is screen printed and fired, and a passivation layer added. Each resistor is trimmed to tolerance by laser. The pre-scribed tile is then broken into strips, the end plating fired on, and the strips broken into individual components. Final termination finish is electroplated matte Sn over a Ni barrier layer.

Characteristics – Electrical

| Size | 0402 | 0603 | 0805 | 1206 | 1210 | 2010 | 2512 | | | |

Key Features

1773204-1 Rev. F 02/2020

Dimensions in millimetres unless otherwise specified Dimensions Shown for reference purposes only. Specifications subject to change

Power Rating:

Resistors shall have a power rating based on continuous load operation at an ambient temperature of 70 $^{\circ}\text{C}$. For temperature in excess of 70 $^{\circ}\text{C}$, The load shall be derated as shown below:

Voltage Rating

Resistors shall have a rated direct-current (DC) continuous working voltage or an approximate sine-wave root-mean-square (RMS) alternating-current (AC) continuous working voltage at commercial-line frequency and waveform corresponding to the power rating, as determined from the following formula:

$$RCWV = VP \times R$$

Where:

RCWV = Rated DC or RMS AC continuous working voltage at commercial-line frequency and waveform (volt)

P = Power Rating (watt)

R = Nominal Resistance (ohm)

In no case shall the rated DC or RMS AC continuous working voltage be greater than the applicable maximum value.

Marking

E24 series 0603 - 2512 3 Digits - first two digits denote significant figures of resistance and third digit denotes number of zeros thereafter. EG

2K2

Marking for E96 Series 0805 - 2512 4 digits - First three digits denote significant figures of resistance and fourth digit denotes number of zeros thereafter. EG.

For ohmic values below 100R letter "R" denotes decimal point. EG

1R8 / 1.8Ω

0402 size chips are not marked

0603 E96 3 digit marking.
