

AT SERIES PHOTOCONTROL

THERMAL, DIE-CAST ALUMINUM HOUSING, WIRE-IN

KEY FEATURES

- Tough die-cast aluminum housing
- Heavy-duty thermal bi-metal switch
- UL | CSA Listed
- 30 - 45 second time delay
- 2000 & 3000 watt ratings
- Fail mode is ON

Our AT Series offers a durable control in areas where photocells are vulnerable to damage. The AT Series rugged die-cast aluminum housing makes it ideal for any outdoor installation.

Controls include a heavy-duty bi-metal switch that provides a 30 - 45 second time delay. This virtually eliminates unwanted lamp cycling that could be caused by lightning, car headlights, or other sudden changes in ambient light level.

Although the Turn-On level is pre-set at the factory, each AT control is furnished with an adjustable slide bar that allows field adjustment in order to satisfy specific needs.

Common uses include billboard lighting, areas vulnerable to vandalism, commercial or industrial use, and harsh and hazardous environments.

Customers can count on consistent, high quality products, driven by TE's proven innovation and backed by our extraordinary customer support.

At Series Photocontrol

TE's photocontrols can be used to safely control luminaries with incandescent, HID, LED, or compact fluorescent lamps.
