The Series FCA-210 relay

is a polarized single-side

stable design, where the

armature holding force in

the deactivated state, and

its flux path is switched and

combined with the coil flux

This results in appreciably

increased contact pressure

in both states over that of a

flux from a permanent

magnet provides the

in the operated state.

All Enclosures have Cupro-Nickel Cans bright acid tin/lead plated after assembly to terminal headers.

Dimensions: Inches \pm .010 (mm \pm .25)

"A" AC Coils 1.125 in. (28.57) Max. DC Coils 1.010 in. (25.65) Max.

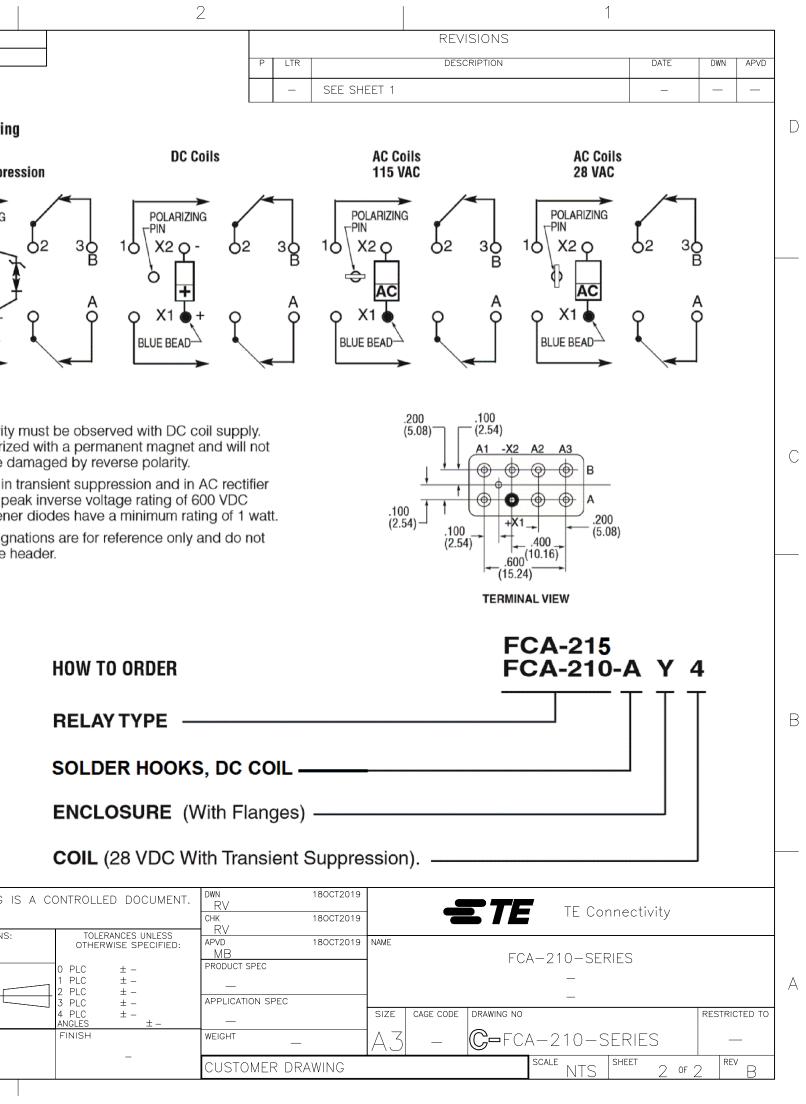

NOTE: Polarity must be observed with DC coil supply. Relay is polarized with a permanent magnet and will not operate or be damaged by reverse polarity.

Diodes used in transient suppression and in AC rectifier circuits have peak inverse voltage rating of 600 VDC minimum. Zener diodes have a minimum rating of 1 watt.
