

Power Relay F4

Pin assignment similar to ISO 7588 part 1

Plug-in or PCB terminals

Customized versions on request

- 24VDC versions with contact gap >0.8mm
- 48VDC version on request
- Integrated components (e.g. resistor, diode)
- Customized marking/color
- Special covers (e.g. notches, release features, brackets)
- Various contact arrangements and materials
- For latching (bistable) version refer to Power Relay F7 A Latching
- For shrouded/weatherproof dust cover versions refer to Shrouded Power Relay F4 A and F4

Typical applications

Cross carline up to 40A for example: ABS control, blower fans, car alarm, cooling fan, Electric Power Steering, energy management, engine control, fuel pump, heated front screen, lamps: front, rear, fog light, main switch/ supply relay, valves, wiper control.

1) Special high performance 24VDC version with contact gap >0.8mm.

2) The values apply to a resistive or inductive load with suitable spark suppression and at maximum 14VDC for 12VDC or 28VDC for 24VDC load voltages. For a load current duration of maximum 3s for a make/break ratio of 1:10.

Current and time are compatible with circuit protection by a typical automotive fuse. Relay will make, carry and break the specified current.

4) See chapter Diagnostics of Relays in our Application Notes or consult the internet at http://relays.te.com/appnotes/

5) For unsuppressed relay coil. Any parallel device to the coil will increase the release time.

6) Electrical endurance data is not valid for diode versions. Any diode or pn-junction parallel to the coil (internal or external) will significantly decrease the electrical lifetime, especially when used for inductive loads.

Datasheets and product specification according to IEC 61810-1 and to be used only together with the 'Definitions' section.

Datasheets and product data is subject to the terms of the disclaimer and all chapters of the 'Definitions' section, available at https://relays.te.com/definitions

Datasheets, product data, 'Definitions' section, application notes and all specifications are subject to change.

Power Relay F4 (Continued)

Max. load DC breaking capacity

Load limit curve 1: arc extinguishes during transit time (CO contact).

Load limit curve 2: safe shutdown, no stationary arc (NO contact).

Load limit curves measured with low inductive resistors verified for 1000 switching events.

Coil Da	ata							
Rated coil voltage 12/24VDC								
Coil ver	sions, DC co	il						
Coil	Rated	Operate	Release	Coil	Rated coil			
code	voltage	voltage	voltage	resistance ⁷⁾	power ⁷⁾			
	VDC	VDC	VDC	Ω±10%	W			
052	12	7.2	1.6	90	1.6			
053	24	14.4	3.2	324	1.8			
056	24	16.0	4.0	268	2.1			
165	24	14.4	2.4	288	2.0			

All figures are given for coil without pre-energization, at ambient temperature +23°C. 7) Without components in parallel.

Coil operating range

Does not take into account the temperature rise due to the contact current $\ensuremath{\mathsf{E}}\xspace$ pre-energization.

Insulation Data

Initial dielectric strength		
between open contacts	500V _{rms}	
between contact and coil	500V _{rms}	
between adjacent contacts	500V _{rms}	
Load dump test		
ISO 7637-1 (12VDC), test pulse 5	Vs=+86.5VDC	
ISO 7637-2 (24VDC), test pulse 5	Vs=+200VDC
