

### Type 3540 Series

4W@70°C in 2817 size package

Suitable for auto placement

Available from distribution

Terminal finish matte sn over ni barrier

TE Connectivity is pleased to introduce this thick film high power device, sister to our popular 3522 series, suitable for auto placement in volume and for most applications. Supplied as standard on 7 inch Reels of 2000 pieces per reel.

### **Characteristics – Electrical**

| Power Rating @ 70°C                   | 4W                      |
|---------------------------------------|-------------------------|
| Resistance Range                      | 1Ω ~ 10ΜΩ               |
| Resistance Tolerance                  | ±1%, ±5%                |
| Temperature Coefficient of Resistance | 1Ω~10Ω ≤± 200PPM/°C     |
| (TCR)                                 | 10.1Ω~10MΩ ≤± 100PPM/°C |
| Max. Working Voltage                  | 250V                    |
| Max. Overload Voltage                 | 500V                    |
| Dielectric Withstanding Voltage       | 500V                    |
| Operating Temperature Range           | -55°C ∼ 155°C           |

Resistors shall have a rated direct-current (DC) continuous working voltage or a approximate sine-wave root-mean-square (RMS) alternating-current (AC) continuous working voltage at commercial line frequency and waveform corresponding to the power rating, as determined from the following formula :

 $RCWV = VP \times R$ 

Where the calculated RCWV is greater than the stated Max. Working Voltage, the Max. Working Voltage will apply.

**Key Features** 

### **Power Rating and Derating**

Resistors shall have a power rating based on continuous load operation at an ambient temperature of 70  $^{\circ}\text{C}$ . For temperature in excess of 70  $^{\circ}\text{C}$ , The load shall derate as shown in chart below.

### **Construction and Dimensions:**

| Turne | Dimensions (mm) |             |                 |             |                 |  |  |
|-------|-----------------|-------------|-----------------|-------------|-----------------|--|--|
| Туре  | L               | W           | Н               | <b>e</b> 1  | €2              |  |  |
| 3540  | 7.10 ± 0.20     | 4.20 ± 0.20 | $1.10 \pm 0.10$ | 0.60 ± 0.20 | $1.80 \pm 0.20$ |  |  |

|                       |                            | cycle of (1.5 hours "on", 0.5 hour |
|                       |                            | "off") at 70°C ± 2°C ambient       |
| Terminal bending      | Resistance change rate is: | 4.33 Twist of Test Board:          |
|                       | ± (1.0% + 0.05Ω) Max.      | Y/X = 3/90 mm for 60 seconds       |

### Marking

A. 4 digit marking for E-96 series:

\*The first 3 digits are significant figures of resistance and the 4th digit denoted number of zeros.

Ex. 127KΩ 1273 \*For ohmic values below 100  $\Omega$ , letter "R" is for decimal point.

B. 3 digit marking for E-24 series:

\*The first 2 digits are significant figures of resistance and the 3rd digit denoted number of zeros

Ex. 120KΩ 124 \*For ohmic values below 10  $\Omega$ , letter "R" is for decimal point

Ex.

# 4.7Ω

3.30

### **Reel Dimensions**

#### **Environment Related Substance**

This product complies to EU RoHS directive, EU PAHs directive, EU PFOS directive and Halogen free.

#### **Storage Condition**

The performance of these products, including the solderability, is guaranteed for a year from the date of arrival at your company, provided that they remain packed as they were when delivered and stored at a temperature of  $25^{\circ}C \pm 10^{\circ}C$  and a relative humidity of 60%RH  $\pm 10\%$ RH, chemical and dust free atmosphere.

Even within the above guarantee periods, do not store these products in the following conditions:

1. In salty air or in air with a high concentration of corrosive gas, such as Cl2, H2S, NH3, SO2, or NO2

2. In direct sunlight
