Ordering Information: Si2336DS-T1-GE3 (Lead (Pb)-free and Halogen-free)

FEATURES

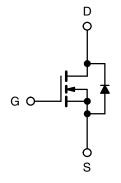

- TrenchFET® Power MOSFET
- 100 % R_q Tested
- Material categorization: For definitions of compliance please see www.vishay.com/doc?99912

HALOGEN FREE

APPLICATIONS

- DC/DC Converters
- **Boost Converters**

Notes:

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

a. Pulse test; pulse width \leq 300 μ s, duty cycle \leq 2 %

b. Guaranteed by design, not subject to production testing.

^{*} The power dissipation P_D is based on $T_{J(max.)} = 150$ °C, using junction-to-case thermal resistance, and is more useful in settling the upper dissipation limit for cases where additional heatsinking is used. It is used to determine the current rating, when this rating falls below the package limit
