

# DATA SHEET

# Surface-Mount Mixer and Detector Schottky Diodes

# **Applications**

- Sensitive RF and microwave detector circuits
- Sampling and mixer circuits
- High-volume wireless
- Wi-Fi<sup>®</sup> and mobile
- Low-noise receivers in high-sensitivity ID tags
- Radio designs

## **Features**

- Tight parameter distribution
- Available as singles, pairs, and dual pairs
- Packages rated MSL1, 260 °C per JEDEC J-STD-020

Skyworks Green<sup>TM</sup> products are compliant with all applicable legislation and are halogen-free. For additional information, refer to *Skyworks Definition of Green*<sup>TM</sup>, document number SQ04–0074.

## Description

These low-cost, surface-mountable, plastic-packaged silicon mixer Schottky diodes are designed for RF and microwave mixers and detectors. They include low-barrier diodes and zero-bias detectors that combine Skyworks advanced semiconductor technology with low-cost packaging techniques. All diodes are 100 percent DC tested and deliver tight parameter distribution, which minimizes performance variability.

These diodes are available in SOD-882, SC-79, and SOT-23 packages. Wiring configurations include singles, series pairs, and reverse series pairs. They may be used at frequencies up to 24 GHz.

Table 1 describes the various packages and marking of the mixer and detector Schottky diodes.

### **Electrical and Mechanical Specifications**

The absolute maximum ratings of the mixer and detector Schottky diodes are provided in Table 2. Electrical specifications are provided in Tables 3 and 4. The associated SPICE model parameters are provided in Table 5. A typical detector schematic diagram is shown in Figure 1.

Typical performance characteristics are illustrated in Figures 2 and 3. Package dimensions are shown in Figures 4 to 8 (even numbers), and tape and reel dimensions are provided in Figures 5 to 9 (odd numbers).

### **Package and Handling Information**

Instructions on the shipping container label regarding exposure to moisture after the container seal is broken must be followed. Otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly.

The mixer and detector Schottky diodes are rated to Moisture Sensitivity Level 1 (MSL1) at 260 °C for 5 seconds. They can be used for lead or lead-free soldering. For additional information, refer to the Skyworks Application Note, *Solder Reflow Information*, document number 200164.

Care must be taken when attaching this product, whether it is done manually or in a production solder reflow environment. Production quantities of this product are shipped in a standard tape and reel format.

#### Table 2. Absolute Maximum Ratings<sup>1</sup>

Parameter	Symbol	Minimum	Maximum	Units
Reverse voltage	V <sub>R</sub>		Rated V <sub>B</sub>	V
Forward current, steady state	IF		50	mA
Power dissipation	P <sub>D</sub>		75	mW
Storage temperature	T <sub>STG</sub>	-65	+150	°C
Operating temperature	T <sub>A</sub>	-65	+150	°C
Junction temperature	Tj		+150	°C

<sup>1</sup> Exposure to maximum rating conditions for extended periods may reduce device reliability. There is no damage to device with only one parameter set at the limit and all other parameters set at or below their nominal value. Exceeding any of the limits listed here may result in permanent damage to the device.

**ESD HANDLING**: Industry-standard ESD handling precautions must be adhered to at all times to avoid damage to this device.
