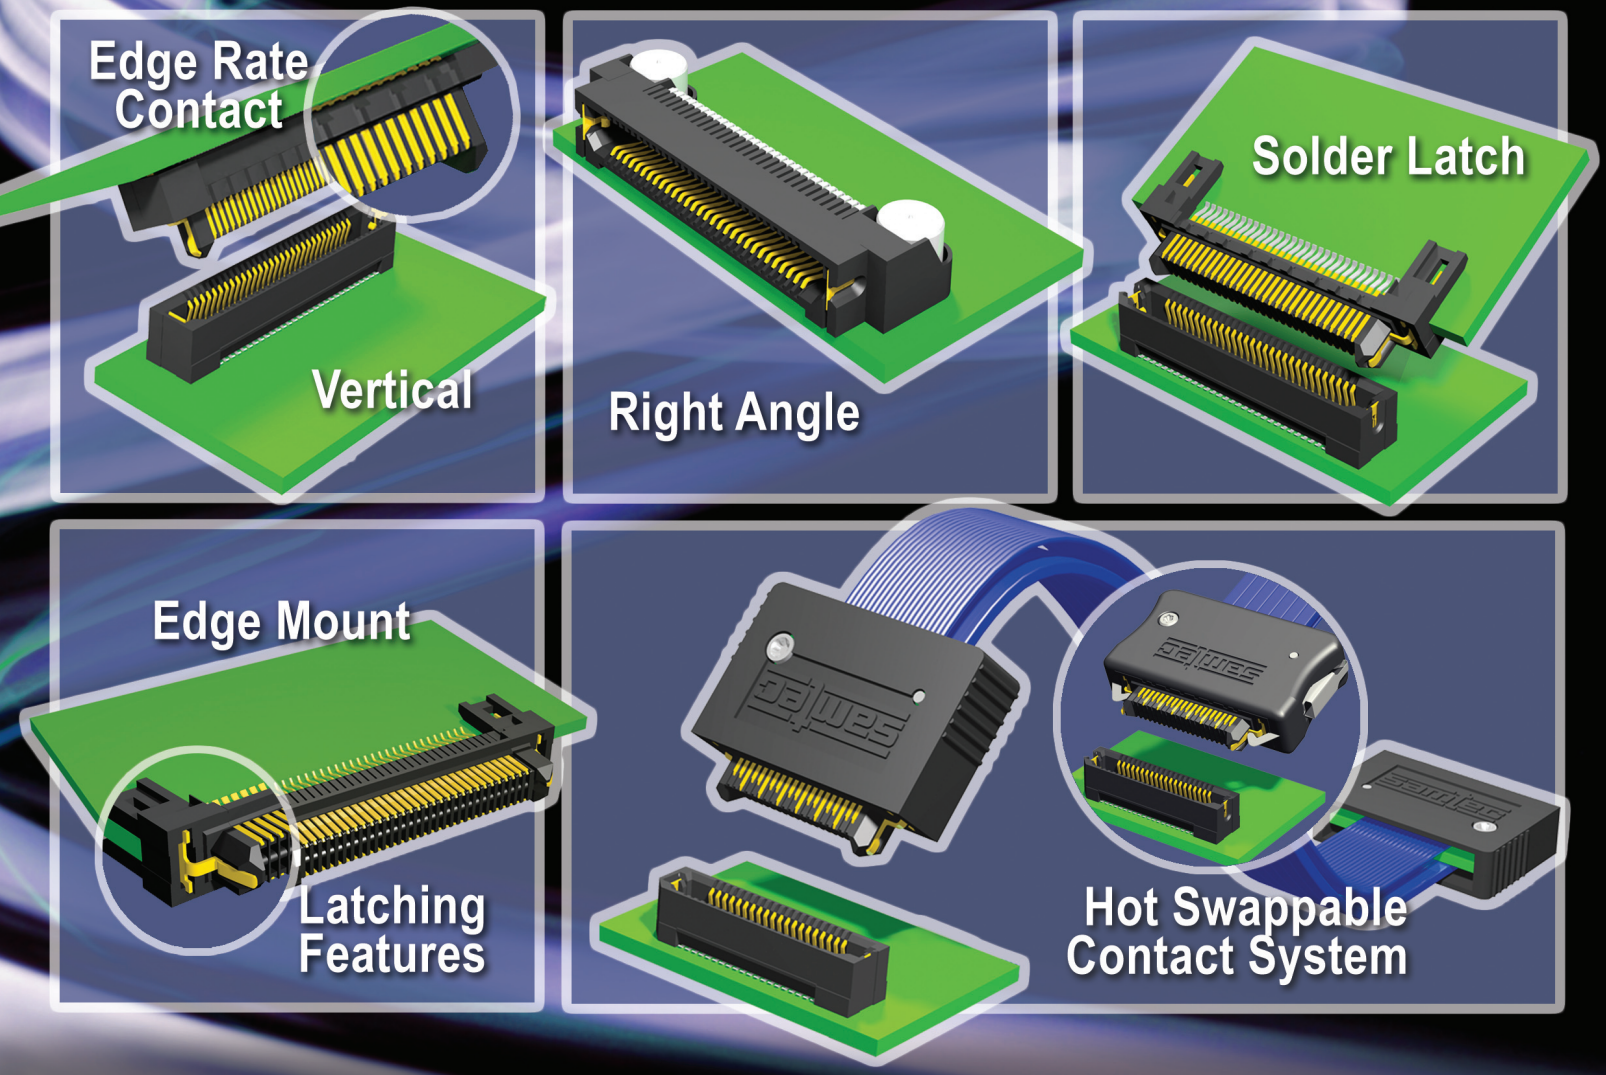
samtec EDGE RATE™ EMULATION FAMILY



EDGE R·A·T·E CONTACT

Samtec interconnects are the solution of choice for emulation tool vendors and semiconductor OEMs, from JTAG debug probes, ICE, global embedded processor debug interfaces, low-level trace, run control, to resource management. Edge Rate™ systems are the standard for NEXUS, Power.org, and ARM.

The Edge Rate™ system was designed to meet demanding emulation requirements. Edge Rate™ reduces crosstalk through minimized broadside coupling, provides better impedance control, while offering higher cycles. Positive latching and multiple contact engagement levels enabling hot-swap capability.
