W8-E2000D40

The W8-E2000D40 is a shock recorder with a high performance piezoelectric accelerometer, a secondary capacitive accelerometer and other environmental sensors. It uploads directly to the enDAQ cloud over WiFi after completing a recording yet this wireless connectivity can be configured to be off when desired. This model is most popular for shock testing due its wide 2,000g range. Its aluminum enclosure improves reliability in harsh environments and widens its frequency response. The W8 offers an impressive 4,000 mAh battery (our largest) to allow for the longest recording times of our sensors.

Product Features

- **Convenient, Adaptable, and Reliable** [Learn More](#)
- **Standalone Wireless Measurement System**
 Embedded sensors, storage, WiFi connectivity, & power
- **Selectable High-Performance Accelerometers**
 Variable capacitance, piezoelectric & piezoresistive
 Selectable measurement range from 16g to 2,000g
 Selectable sampling rate up to 20,000 samples per second
- **Up to 8 Billion Data Points of Memory**
- **Embedded Sensor Suite**
 Gyroscope, magnetometer, pressure, temperature, humidity & light
 Now includes GPS and Microphone
- **Triggering from Sensors and/or Time-Based**
- **Rechargeable Battery Life of Many Days**
 Extend battery life with triggering and/or external power
- **Simple USB Interface for Download & Charging**
- **NIST Traceable Calibration**
- **Trusted by Over 2,000 Different Commercial Customers**

Battery & Storage Performance

Battery performance is heavily dependent upon the device configuration (sensor sample rates and triggers), battery age (including charging cycles), temperature, and WiFi interference/strength. The following table provides the battery life and storage capacity of this device assuming it has a relatively new battery and it is at room temperature. When showing performance it assumes all sensors are on at the default sample rate with the main accelerometer sample rate driving performance. **It also assumes wireless upload is turned OFF. If the device is uploading to the cloud after every recording, assume a battery life of 50% that listed below.** With triggers, it assumes the device is in trigger mode 99% of the time. Here are some additional resources: [Measurement Settings](#), [Battery Specifications](#), [Battery Life Estimator Tool](#).

Sample Rate	Storage Capacity	Continuous Recording	Main Accel. Trigger	2nd Accel. Trigger	Periodic/Time Trigger
100 Hz	44 days	8 days	8 days	33 days	2.3 years
1,000 Hz	18 days	8 days	8 days	33 days	2.1 years
5,000 Hz	6 days	6 days	8 days	33 days	1.7 years
20,000 Hz	34 hours	3 days	8 days	33 days	320 days

Mechanical Specifications

Mass	250 grams
Case Material	Aluminum Base, Polycarbonate Top
Mounting - Screw	10-32 Bolts (23 ft-lb)
Mounting - Tape (Double Sided)	3M 950 Tape
Length	99.8 mm (3.93")
Width	58.6 mm (2.31")
Thickness	45.6 mm (1.80")
Ingress Protection	IP 50 (Dust Protected)
