

HDBaseT 3.0 Transmitter/Receiver, HDMI 4K 60 Hz (4:4:4), RS-232, IR Control, Up to 328 ft. (100 m), TAA

MODEL NUMBER: BHDBT3-TR

Extends the range of your uncompressed 4K video/audio, Ethernet, IR, RS-232 serial or USB signal up to 328 ft. via Cat6a cable.

Features

Designed with the Newest HDBaseT 3.0 Technology

This 4K video transceiver performs the functions of either a transmitter or receiver, depending on your AV solution. Using a single Cat6a cable (HDBaseT3 certified) with zero latency, the BHDBT3-TR extends true 4K uncompressed video and audio up to 328 feet (100 meters) with the latest HDBaseT standards. It also transmits Ethernet, RS-232 serial, USB and IR control up to 328 feet, making it ideal for conference halls, auditoriums, lecture halls, museums, exhibition rooms and anywhere else that requires high-quality transmission and an easy-to-use application.

Transmits 4K Video with HDR and 4:4:4 Color

Using an HDBaseT3-certified Cat6a cable with no latency, the BHDBT3-TR extends Ultra HD 4K resolutions up to 4096 x 2160 at 60 Hz. It supports HDR (High Dynamic Range), providing a wide range of vibrant colors with richer contrast, brighter whites and deeper blacks that pop on your 4K display. HDCP 2.3 encryption allows you to stream 4K Amazon and Netflix content with no complications. This transceiver also supports uncompressed 4:4:4 chroma subsampling for top-level PC gaming or using your HDTV as a PC monitor.

One Transceiver Handles Multiple Functions for Streamlined Performance

In addition to 4K video, the BHDBT3-TR also extends bi-directional RS-232 serial, full-range IR remote control, Gigabit Ethernet and USB 2.0 up to 328 feet (100 meters). This allows connection of barcode scanners, Ethernet routers and a wide range of USB peripherals, among other components.

Stable HDMI Signal Transmission

The BHDBT3-TR is equipped with HDMI audio embedded/de-embedded functions, allowing you to flexibly adapt suitable audio/video combinations based on different environments. To ensure nonstop operation, a fanless fin heat sink prevents overheating and elevates the transceiver's reliability.

Avoid Signal Disruptions with Extra-Secure Locking HDMI Connectors

Having a cable come loose accidentally can cause AV signal loss. Universal HDMI cable locks help prevent accidental disconnection and signal disruption. This is especially helpful for ensuring components stay attached in difficult-to-access installations.
