

# Large Arc Buffer Link Span Kit for Wire Mesh Cable Trays (4 in. tall)

MODEL NUMBER: SRWBARCBFFL4

Provides structural support and creates a radius for connecting an intersection in your custom-designed wire mesh runway.

## Features

### Arc Buffer Bracket Helps You Create Custom Cable Management Schemes

This SmartRack® arc buffer creates a secure connection point between two intersecting sections of wire mesh cable tray in your server room or data center. This allows you to create a radius for 90-degree intersections and shape the direction of cabling to your liking. The black powder-coated metal plate adds a radius that further strengthens and supports the bundled cables, allowing for more voluminous and comprehensive runs. Four couplers are included for quick installation. The SRWBARCBFFL4 is designed for wire mesh cable trays four inches in height, such as SRWB6410STR, SRWB12410STR and SRWB18410STR.

## Highlights

- Securely and safely connects wire mesh cable trays along a ceiling, floor or wall
- Allows you more flexibility in routing custom cable management intersections
- Compatible with wire mesh cable trays measuring 4 in. tall
- Includes 4 couplers for immediate installation in your data center

## Applications

- Organize a wire mesh cable tray system with intersecting sections along the wall, floor or ceiling of your data center

## System Requirements

- Compatible with 4-inch-tall wire mesh cable trays, such as Tripp SRWB6410STR, SRWB12410STR and SRWB18410STR
